

# DAYAMOY ADHIKARI

Senior Android Engineer

Bengaluru, India | [adhikaridayamoy@gmail.com](mailto:adhikaridayamoy@gmail.com) | +91-8342891018 | [@damercysivzarc](https://twitter.com/damercysivzarc) | [dayaonweb.dev](https://dayaonweb.dev) | [github.com/Damercy](https://github.com/Damercy) | [linkedin.com/in/damercy](https://linkedin.com/in/damercy)

## SUMMARY

Senior Android engineer with ownership across fintech, consumer, and POS applications. Focused on payments, performance optimization, and scalable Android architecture in high traffic and regulated production environments.

## EXPERIENCE

### Senior Android Engineer, Angel One | Aug 2024 – Present, Bengaluru

- Built a remote configurable in-app help navigation system eliminating release dependency for help content updates.
- Revamped the Add Funds module with modern MVVM using Kotlin Channels and Flows.
- Integrated 1 Click Pay SDK enabling in-app fund addition without third party UPI apps.
- Reduced biometric authentication latency by approximately 500 ms.
- Executed refactors, analytics integrations, and service migrations improving scalability.

### Senior Android Engineer, Paytm Insider | Jun 2022 – Jul 2024, Bengaluru

- Architected an offline first POS Android app for events with 5K to 50K footfall.
- Designed caching and synchronization for near real time data consistency.
- Reduced consumer app size by 36 percent via modular optimization.
- Improved Events module cold start time by 4 seconds.
- Integrated analytics, feature flags, and error logging for better observability.

### Android Engineer, WedMeGood | Sep 2021 – May 2022, Gurgaon

- Reduced local build times by 60 percent through Gradle optimization.
- Implemented CI CD pipelines using GitHub Actions.
- Owned revamp and release of the Wedsta Family Makeup module.

### Android Engineer, Vitto | Jun 2020 – Sep 2021, Gurgaon

- First Android hire, built consumer app contributing to 200K USD pre seed funding.
- Implemented multilingual voice enabled onboarding using Android TTS.
- Ran Google Play open testing with 300 users and iterated on feedback.
- Set up CI CD pipelines and supported Android team scaling.

## SKILLS

**Android:** Kotlin, Coroutines, Flow, Channels, Jetpack Compose, Glance, profiling.

**Architecture:** MVVM, modularization, offline first systems, fintech flows.

**Engineering:** CI CD, GitHub Actions, GitLab, analytics, build optimization.

## EDUCATION

### Bachelor of Technology in Computer Science and Engineering

KIIT University | 2017 – 2021 | CGPA 9.30
